ETD ELECTRIC TERMINAL DEVICE
ETD Electric Terminal Device from Motion Control

PRODUCT DESCRIPTION
The Motion Control ETD (Electric Terminal Device) sets the standard for ruggedness, functionality, and water resistance. Now the preferred choice of hundreds of users, the ETD can be used with every available myoelectric system, and is available with Flexion (or Multi-Flex) Wrist, as well as the new ultra fast MC Electric Wrist Rotator. The ETD ProHand option features a controller inside the ETD so you can interchange with other manufacturer’s systems. This is truly the most practical, durable and versatile TD on the market.

(Image: ETD with Optional Flexion Wrist)

FEATURES AND BENEFITS
- Rugged durability – enhanced further by optional Titanium hook fingers
- Powerful, responsive and precise
- Wide opening and fine tips allow high visibility
- Lightweight (only 14 oz.) - lightest work TD available
- Safety Release
- Water Resistant
- High speed motor – new option available with ProHand version
